Crop Disease Sampling Guide

Botrytis cinerea

1. Take the provided swab and swab infected berry.
Please use one swab per sample.
2. Where possible collect your samples from different locations within your block.
3. Place the swab back into the capsule and close the lid. Indicate which site they were taken from on the information sheet provided.
4. Place the swab capsules into the prepaid envelop, together with the information sheet indicating variety and spray regime .
5. Place in the nearest mail box
